

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 5.3 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 8.6 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 5.9 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 11.6 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 4.3 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 7.7 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 4.8 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 7.9 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 5.3 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 13.5 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 5.7 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 8.2 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 5.4 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 15.1 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 4.1 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 8.6 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 4.7 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 9.7 mmol/L.

Name_____ Date_____

The glucose tolerance test

A fasting blood glucose level is 3.8 mmol/L.

Two hours after drinking the glucose solution, a blood glucose level is 7.5 mmol/L.
